

Virtual-IT

Suppliers of Learner Management Systems

If you are looking for a solution to your training administration nightmares and would like it Cloud Based, look no further!

Virtual-IT Goes Cloud Based!!!!

As with any of our products our business is based on Client and Industry needs Companies can now buy one of our Server/Computer based database systems and host it on their own server Or they can host their purchased LMS on our Cloud Server.

So what are the advantages of a Cloud Based LMS?

Disaster Recovery : The loss of data can be catastrophic for any business With hosting your LMS on our Cloud Server your data will be backed-up twice a day

LMS Software Updates Done for You: With Cloud Hosting you don't have to worry about the time or personnel to ensure your LMS software is up-to-date Updates take place for you by your LMS service provider

Work from Anywhere: Work from anywhere you have an internet connection In most instances, you can connect using laptops, tablet, and even smart phones Meaning that you can work anytime you wish from any location

Scalability: One of the benefits of Cloud based Products is being able to increase /decrease your server needs

Virtual-IT

Suppliers of Learner Management Systems

Easy to Use: Virtual-IT databases have been supporting southern African Industry for over 15 years, so our products are tried and tested, we are now offering our easy to use databases via the cloud. Users can login from anywhere in the world using their laptops, tablets or even mobile phones.

Green: Our databases have been “Green” for many years By installing, supporting and training via the internet we have cut our carbon foot print With these new Cloud based systems we will continue along that path

Easy Access: As long as you have an internet connection you can access the database from anywhere and anytime.
