

Virtual-iT

Suppliers of Learner Management Systems and e-Learning Services

Virtual-Learning

The Smart Way to Train

Want to get your Courses Online Quickly?

There are a lot of advantages with using e-Learning, for example:

- Savings on your Current Classroom expenses
- Rapid Course Deployment
- It can form part of a Blended Learning Training Intervention
- You are no longer restricted to the size of your Classroom when it comes to enrolling Learners
- Automated Assessments and Certificates
- Flexible Reporting..... And much more

One of the main advantages of e-Learning is its cost effectiveness:

- No Travelling costs
- No Printed Training content
- No Down-time when on route to a Training location
- No Venue or Refreshment costs
- No Facilitator costs

Once your Course is uploaded you can present it as many times as you wish, and all Learners will get Course Quality Consistency – Each learner goes through the same experience regardless of when and where he or she takes the course.

If we upload your current Training Materials, the deployment of you online Courses can be a quick process. We can then take your Assessment documents and convert the questions (where possible) into formats that work well on the internet: Multiple Choice, Matching, True/False etc.
